Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

	Application No.	Applicant(s)			
Office Action Summany	09/749,144	ROORDA, WOUTER			
Office Action Summary	Examiner	Art Unit			
	Jason Benton	3747			
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
Status					
1)⊠ Responsive to communication(s) filed on <u>08 Ja</u>	nuary 2007.				
	action is non-final.				
3) Since this application is in condition for allowar					
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.					
Disposition of Claims					
4)⊠ Claim(s) <u>1-6,8,10,11,24 and 33-37</u> is/are pending in the application.					
4a) Of the above claim(s) is/are withdrawn from consideration.					
5) Claim(s) is/are allowed.					
6)⊠ Claim(s) <u>1-6,8,10,11,24 and 33-37</u> is/are rejected.					
7) Claim(s) is/are objected to.					
8) Claim(s) are subject to restriction and/or election requirement.					
Application Papers					
9) The specification is objected to by the Examiner.					
10) The drawing(s) filed on is/are: a) acce	epted or b) objected to by the	Examiner.			
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).					
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).					
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.					
Priority under 35 U.S.C. § 119					
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of:					
1.☐ Certified copies of the priority documents have been received.					
2. Certified copies of the priority documents have been received in Application No					
3. Copies of the certified copies of the priority documents have been received in this National Stage					
application from the International Bureau (PCT Rule 17.2(a)).					
* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-3, 5-6, 8, 24, 33, 34, 36, and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Duffy.

The patent by Duffy (6,048,332) shows the method of delivering an arteriogenic factor to a vessel region in a medically effective manner to structurally enlarge an existing blood vessel.

It is the opinion of the examiner that the delivery of an arteriogenic factor to a vessel region would result in the arteriogenic factor being supplied to the primary vessel and any bypass vessel in the region.

The examiner agrees that the vessel region of Duffy is not inherently injured. However, catheters commonly touch the vessel wall, and it is the view of the examiner that should the catheter touch the vessel wall, damage is done. Therefore it is the view of the examiner that the patent by Duffy showing a catheter to be introduced into a blood vessel region would be capable of performing as is required in the claim limitations, even if it does not specifically state in the patent that damage is done to the blood vessel wall.

A needle catheter or a balloon catheter is provided to accommodate the arteriogenic factor. The arteriogenic factor is advanced from the needle catheter or the balloon catheter to the vessel region.

The patent by Duffy (6,048,332) does not specify the delivery timing of the arteriogenic factor. It is the view of the examiner that the length of delivery duration and the timing of delivery is an obvious choice of design dependant on the type of arteriogenic factor being delivered to the blood vessel region.

Claims 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Duffy.

The patent by Duffy (6,048,332) does not specify the temperature of the catheter. It is the view of the examiner that the temperature of the catheter is an obvious choice of design dependant on the type of arteriogenic factor being delivered to the blood vessel region.

Claims 4 and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Duffy.

The patent by Duffy (6,048,332) does not specify that the arteriogenic factor can be delivered with a syringe. It is the view of the examiner that the method of delivery of the factor, whether it is a syringe or catheter is an obvious choice of design. Both methods of delivery are well known in the art and no new or unexpected results are achieved by delivering the arteriogenic factor with a syringe rather than a catheter.

Response to Arguments

Art Unit: 3747

Applicant's arguments, see page 9 of appeal brief, filed 1/08/07, with respect to the rejection(s) of claim(s) 1, 5-6, 8, 24, 36, and 37 under 102(e) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

However, upon further consideration, a new ground(s) of rejection is made in view of Duffy. As was stated previously, the examiner agrees that the catheter of Duffy does not inherently injure the blood vessel region but is capable of injuring.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Benton whose telephone number is (571) 272-4838. The examiner can normally be reached on M-F 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steve Cronin can be reached on (571) 272-4536. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
